Report of activities

The Robben Stichting continued its activities fully within the scope of both the policy and objective of the Stichting. As the list of endorsements is quite extensive we highlighted some of the donations below

- **Museums and art:**

The Robben Stichting believes that culture is essential in the development of the world. Art (in the broadest sense) and museums contribute to this purpose. The Robben Stichting has for this purpose endorsed various charitable organizations in 2020.

- **Science, education and healthcare:**

As mentioned in the articles of incorporation the Robben Stichting believes that next to the cultural objectives the foundation should also endorse healthcare, science and education. For this purpose, the Robben Stichting endorsed in 2020 various charitable organizations.
